Medical Superintendent cum Vice Principal
School of Tropical Medicine, Kolkata
Medical Superintendent-Cum-Vice-Principal
Sarmichael Hospital for Tropical Diseases
School of Tropical Medicine
Kolkata

Technical specification of “Cord Blood Processing Bag for the Cord Blood Bank, STM, Kolkata:

1. The CBP Kit must consist of three bags integrally connected by tubing, two of which are PVC bags – one larger bag & one smaller bag and a third smallest bag which is the Cryo bag /freezing bag.
2. The larger bag should have a fill volume of 200-250 ml with an attached spike for transferring content from a different collection bag. It must have one leak proof access port for injecting chemicals inside or taking out sample. One additional entry port to this bag is preferred for injecting chemicals only through the nozzle of the syringe without using needle with very narrow calibre connecting tubing for administration of Cryoprotectant(s).
3. Other smaller bag should have a fill volume of 150-175 ml. It must have one leak proof access port for injecting chemicals inside or taking samples from the bag.
4. The third integrally attached bag (Cryo bag/Freezing bag) consists of EVA material or approved material for storing stem cells at ultra low temperature (minus 196°C) of liquid nitrogen. It should be a 3 dimensional or 2-dimensional with a dual compartment 25ml bag consist of 20ml & 5ml capacity.
5. Length of this Cryo bag/Freezing bag is 85-90 mm & Height 60-70 mm (However the total height is 70-75 mm including the height of the two ports of the bag one connected with the 20ml part and other connected with the 5ml part). This Cryo bag/Freezing bag along with 100-210 mm integral tube segment should fit inside the metal cassette with dimension 91-92mm (Length) X 84-85mm (Width) X 8-9mm (thickness) for preservation.
6. Temperature range of storage should be minus 196 °C to plus 40° C.
7. Easily manipulative clamp must be present on every connecting tubing from bag to bag and from bag to spike and bag to entry or exit ports.
8. The kit should have an expiry of at least 2 years from the date of manufacture.
9. The kit manufacturing process should follow the national and or international standards like ISO etc. so that the bags are pyrogen free, sterilised, animal pathogenicity test passed, can withstand the shearing force during centrifugation etc.
10. Should have US FDA/ Indian FDA approval certificate.
11. Other requirement (if approved and order is placed for purchase):-Each supply lot/batch has to be provided with Certificate of Analysis (quality assurance certificate) otherwise the kit will not be accepted.
